

## THEME 3 MOVIES READING SKILL (ERKAD)

### A. Read the movie reviews and tick the main idea.

1. It is a great fantastic movie but not suitable for kids under nine years old.
2. It is about a family life.

Parents need to know that this first movie of the Harry Potter series has some intense and scary moments. Harry Potter and his friends - who are only eleven years old here - are in danger and get hurt, but not seriously. Also, they are very scared of the fantastic beasts in the movie.

**Kid, 11 years old :** A Good movie to start the Harry Potter series. A very good movie with a good introduction of Harry, his friends, all the wizards and witches at Hogwarts. A wonderful story of Harry's adventures.

**Kid, 10 years old :** A little scary but awesome. It is such a wonderful and magical film but I find the man with two faces very scary. Although I haven't seen that man for a year, I still think he is too scary for me! Don't get me wrong, it's an awesome film! The best of the series I think!

**Parent of 5 and 7-year-old kids :** Wait till they're older. A Great Movie! You see, my kids don't watch a lot of movies, but sure enough, they loved the fantasy in this. I probably love it more than them. Parents won't really get their kids into this movie until they're older than nine, but you can't take them away from these movies, I know from my experience.

### C. Read the text and complete the sentences.

As you watch the action hero on the screen, you are amazed at how he's able to dodge death at every turn. From exciting car chases and explosions all around, today's movie stars survive some unbelievable dangers. Do not believe all you see in movies. The actors aren't performing every scenes especially the action scenes. How do they film all those incredible scenes? Would you like to know what goes on behind the cameras? Let's discover it.

A stuntman is a person who takes an actor's place during the filming of stunts and dangerous scenes for a movie or TV show. Today, they create stunts with computer - generated special effects. These effects still look real on the big screen, but they don't put anyone in harm's way to get that really cool explosion on film.
